

# Flawless Makeup

When was that last time you had your makeup done? Well, things have changed. Gone are the days of oily foundations, today colour can be magically applied by an airbrush. This is the makeup world's latest and biggest trend. Water-base, hypoallergenic make-up is misted onto your face by a professional (don't try this yourself!) and the results are a sheer, light application that feels and looks fabulous.

Westmount Living's own Stephanie Horne visited Mindy Shear makeup studio in Westmount Square to try out this hot new method of makeup application. In the business for 22 years, Mindy likes to keep on the cutting edge of cosmetics. She travels many times a year to trade shows in search of the latest techniques. She specializes in airbrush makeup and semi-permanent eyelashes - a kind of hair extension for your eyes that can last from one to four weeks. Mindy has made up models, actors, brides, and people who just want to look great. Her years of experience have led her to work with manufacturers to create her own Mindy Shear line. "I use only the best ingredients," says Mindy.

Mindy Shear is open 10-6, daily or she will come to your home - for after-hours, call for an appointment. Whether you have that special occasion or just want to know the proper way to use your makeup, or perhaps want to cover up an old tattoo, Mindy Shear has the expertise you're looking for.

As for Stephanie, she was impressed. "I wore it all day and it felt great. It didn't even feel like I was wearing makeup. I ran out of energy before my makeup did!"

located in Westmount Square for 8 years, Mindy also carries accessories.

For more information call Mindy Shear Studio at 514-932-0032 or go to [www.mindyoshear.com](http://www.mindyoshear.com)

Mindy uses the Airbrush method to apply Stephanie's makeup

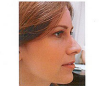

Adding carefully selected colour, a blush was also airbrushed onto Steph's face

Lash applicator is added before mascara

Mindy carefully adds lip liner

Flawless!

## The Smart way to lose with the **Smart for Life** Cookie Diet
